Featured Projects

Xbox Kinect Mobile Phone

- A high-performance gaming phone from Xbox that integrates the full functionality of Kinect. This phone is equipped with advanced cameras and sensors to capture your movements and translate them into game actions, just like the original Kinect device. Enjoy immersive motion-sensing gameplay and the power of Xbox gaming in a compact, mobile device

Stone Island Material Lab AR Goggles

- "Research, experimentation, and usability" are the cornerstones of Stone Island's success as a fashion outdoor brand. In their materials lab, AR goggles are a key product, helping them delve deep into the world of materials.
